

**AMENDMENTS TO THE CLAIMS**

**1-5. (Canceled)**

**6. (Currently amended)** ~~An inhibitor for an interaction~~ A method for inhibiting formation of a complex between a target protein that interacts with a c-Fos protein and the c-Fos protein, which comprises the protein according to claim 1 or 2 or a protein translated from the nucleic acid according to any one of claims 3 to 5 or 133 as an active ingredient said method comprising:

introducing a protein into a system containing the c-Fos protein and in which the complex is to be formed, wherein said protein is selected from the group consisting of:

(a) the protein comprising the amino acid sequence of SEQ ID NO: 96;

(b) the protein comprising the amino acid sequence of SEQ ID NO: 97; and

(c) the protein comprising the amino acid sequence of SEQ ID NO: 96, including a deletion, substitution or addition of one amino acid residue, and which interacts with the c-Fos protein; and

(d) the protein comprising the amino acid sequence of SEQ ID NO: 97, including a deletion, substitution or addition of one amino acid residue, and which interacts with the c-Fos protein.

**7-133. (Cancelled)**

**134. (New)** The method according to claim 6, wherein the protein (a)-(d) is caused to exist in the system.
